

INTERIOR & LIVING DESIGN

The master course is a training program of excellence, able to reflect on the changes and transformations of the built space, promoting a permanent research activity for design models and innovative solutions.

The program provides a cultural knowledge that is half-way between arts and other disciplines. It explores all the aspects concerning interior design, from the most technical to the most intuitive ones.

→ THE STRUCTURE

In the first phase, the course is structured around theoretical lectures focusing on the areas of Strategy and Research with practical sessions consisting of thematic workshops and technical visits. This allows students to get acquainted with the use of design tools for industrial and handicraft production and for functional and stylistic transformations. During the last months of the course, students carry out an original piece of high-level research in a specific area.

→ THE AUDIENCE

The program addresses young graduates or professionals who wish to broaden or improve their abilities with cultural and technical tools and are interested in following an advanced in-depth course.

→ THE FUTURE

The master course aims at creating a new profession: a designer who knows how to combine technical/design knowledge and solid cultural background with the strategic ability to identify new scenarios for contemporary living.

LANGUAGE

English. Some lectures may be simultaneously translated from Italian into English

DURATION

12 months
