

# URBAN VISION & ARCHITECTURAL DESIGN

The master course trains professionals to reflect on public space metamorphosis within contemporary urban context, to re-design spaces, to manage complex architectural and territorial issues with a particular focus on planning, landscape design, environmental sustainability and renewable energy. Restoring a vision in which planning, architecture and design skills, social and anthropological analysis, marketing and communication tools contribute to the creation of a new professional identity able to redefine functions and aesthetics for the urban spaces.

### THE STRUCTURE

The program is structured around five modules consisting of lectures and workshops: Tools and Languages, Strategies and Vision, Architectural Link, Urban and Landscape Design, Architectural Design. Then, participants are involved in a learning and research experience through meetings with professionals and technical visits to architectural sites. The Final Master course Project focuses on specific topics concerning urban and architectural design.

### THE AUDIENCE

The program addresses people from urban, architectural, economics, human science, social and communication disciplines interested in developing a personal approach and improving their architectural sensitivity according to urban transformation needs.

### THE FUTURE

Different career opportunities are envisaged at national and international level such as Project Manager, Urban Designer, Consultant in Architectural Design Studios, Engineering Offices, Urban Management Offices, Territorial Development Agencies, Public Planning Administration Departments, Real Estate Companies, Design Offices.

### LANGUAGE

English. Some lectures may be simultaneously translated from Italian into English

### DURATION

12 months
