

DOMUS ACADEMY
MILANO

GENERAL ENTRY REQUIREMENTS FOR ACCESS TO 3-YEAR BACHELOR OF ARTS PROGRAMMES

HIGH SCHOOL QUALIFICATIONS DATABASE

Introduction to the database

This document outlines the main upper-secondary school qualifications awarded worldwide, together with the general eligibility criteria and needed documents required for admission to our Bachelor of Arts programmes.

Given the diversity and constant evolution of global education systems, the database is updated regularly. Countries currently included are those from which the University receives the highest number of applications; additional countries will be added progressively.

The absence of a specific qualification does not imply that it is not suitable, and, on the other side, the presence of a qualification does not guarantee admission to a course, as every single case is assessed individually taking into consideration also possible updated requirements at the moment of formal evaluation. Applicants holding qualifications not yet listed are encouraged to submit their documents for evaluation or contact our counsellors for assistance at info@domusacademy.it.

Evaluation Process Criteria

While the qualification awarded is a central element of the evaluation process, it is not the only factor considered. Each case is assessed individually by the Admission Commission, which may request additional information, documentation, or clarification at any time to determine eligibility or confirm matriculation.

The information provided in this document serves as a general reference and does not exempt applicants from submitting all mandatory documents required for application and enrolment.

Students must provide **official documents** issued by their institutions; unofficial materials (screenshots, self-produced documents, etc.) are not accepted.

We accept documents in **Italian, English, French, or Spanish**. Documents issued in other languages must be accompanied by an **official certified translation**.

General Entry Requirements

In line with MUR (Italian Ministry for University and Research) regulations published annually in the *Procedures for Entry, Residency and Enrolment of International Students* and related *Annexes*, access to accredited (degree-awarding) Bachelor's programmes require:

1. A minimum of 12 years of previous education

Students holding a qualification awarded after *11 years of schooling* may compensate for the missing year through one of the following options:

- **One full year of University/College studies** (outside Italian education system): all prescribed exams must be completed before the BA programme begins. Applicants must submit official transcripts (partial documentation may be considered at application stage) and the official study plan/syllabus. Final documents must be legalized for matriculation.

Please note that the additional year cannot be used for a shortened study plan and therefore does not allow entry into the second year. The year of university studies considered for admission cannot be reassessed for further credit recognition to avoid double evaluation

- **Foundation Year:** Applicants must provide either an attendance certificate (accepted at the application stage only) or a completion certificate. Final documents obtained abroad must be legalized.

Specific cases:

- *Peru, Costa Rica, Venezuela, El Salvador, Guatemala:* As an alternative to one year of post-secondary education, students may matriculate by providing documentary evidence of the Pre-Escolar year.
- *Colombia:* Although the pre-escolar year exists, Italian Embassies and Consulates do not accept it for matriculation. Only EU passport holders residing in Colombia may present evidence of the pre-escolar year.

2. Completion of the last 2 years of study within the same education system

Last two years of the high school path must have been attained in the same education system (unless mobility proved between schools with an existing agreement). We anyway invite students who don't meet this criteria to contact us with additional information about their educational path, to better understand their specific situation and understand if this criteria is equally met or not. Students not meeting this requirement may be asked to provide further documentation; if the assessment is not favorable, they may still be offered admission to the **non-accredited Diploma Program**.

3. Completion of any national required exam for access to higher education

If a national test or final examination is required for university access in the applicant's home country (e.g. Gao Kao / Yi Kao in China, Vestibular in Brazil, YKS in Turkey, Selectividad in Spain), it is equally required for entry into Italian BA programmes. Applicants must provide reliable proof of it.

If a student has not taken the mandatory national test or cannot provide required grades/APs/more than one A-Levels, the following alternatives are accepted:

- One full year of University/College studies (as described above)
- Foundation Year (as described above)

4. A valid Secondary School Diploma that meets the requirements for access to Italian universities

A diploma that grants university access in the home country does **not automatically** qualify for admission to Italian universities. Only qualifications that meet Italian MUR standards are considered valid, and additional steps may be required if they do not.

Equivalency certificates issued by Schools may be considered an additional tool to evaluate a qualification, nevertheless, cannot substitute an official accredited qualification.

Additional requirements apply for English language proficiency and any criteria specific to individual qualifications.

Applicants who do not meet the criteria above may be eligible for the non-accredited Diploma Program Path.

Important notice related to schools offering international or abroad stream (such as but not limited to IB Diploma, American High School etc): if the school offers only an international stream without a national stream, it is necessary to consider and met relevant requirements of the specific qualification earned, despite the country in which the school is located. For example: for an international school in any country offering IB Diploma but not local national qualification, students must meet IB Diploma requirements and produce related documentation – equivalency certificate issued by local authorities may be subject to further evaluation for approval.

Final Considerations

This document aims to support prospective students in understanding the general regulatory framework for the recognition of foreign secondary school qualifications. However, it cannot cover every possible situation and does not replace an individual evaluation or the official regulations issued annually by the Italian Ministry of University and Research, or any further specific in evaluation methodology suggested by CIMEA which may be implemented and/or changed any time.

Applicants are strongly encouraged to: consult the relevant ministerial documents, verify specific requirements applicable to their education system, contact their counsellor for clarification at info@domusacademy.it.

The University is committed to assisting candidates throughout the process and ensuring that each qualification is assessed in accordance with national regulations and institutional standards.
